

Along with the funding provided by Act 89 of 2013, the department was able to reorganize the deputate to provide a higher level of services and funding to local governments. To accomplish this, the Bureau of Municipal Services has been reorganized and its functions integrated into the bureaus in the Office of Planning Deputate--the **Center for Program Development and Management (CPDM)** and the **Bureau of Planning and Research (BPR)**.

The reorganization will focus the consideration of local government issues throughout the Office of Planning and create a stronger link with Municipal Associations. This link will continue to strengthen the department's focus on services to local governments through the continued relationship with the District Municipal Services Representatives.
